DISCLAIMER

DUE TO THE CONFIDENTIAL NATURE OF SOME OF THE PROJECTS WE HAVE WORKED ON, WE ARE UNABLE TO PUBLICLY SHARE IMAGES OR DETAILED SCREENSHOTS ON THIS PORTFOLIO. HOWEVER, WE WOULD BE HAPPY TO PROVIDE PROJECT-SPECIFIC VISUALS, CASE STUDIES, OR FURTHER DETAILS UPON REQUEST. PLEASE CONTACT US DIRECTLY TO LEARN MORE.

## PROJECT TITLE

Patient Case Tracking Software

## TYPE

Web Development

## INDUSTRY

Healthcare

## PROJECT DESCRIPTION

We developed a patient case tracking software that enables administrators to efficiently monitor and follow up on patient cases. The platform provides a secure, user-friendly interface for tracking patient progress, updating case details, and scheduling follow-up appointments. Designed to improve workflow and patient care, it streamlines communication between healthcare providers and administrators.

## PROJECT TITLE

AI Document Summarizer

## TYPE

AI Development

## INDUSTRY

Healthcare

## PROJECT DESCRIPTION

We developed a custom AI-powered document summarizer that uses advanced natural language processing to automatically extract key information from lengthy documents. The tool provides concise, accurate summaries, enabling users to quickly grasp essential content. Designed for efficiency and scalability, it enhances productivity by reducing the time spent reviewing large volumes of text.

## PROJECT TITLE

Community Board Meeting Minutes Scraper & Resolution Extractor

## TYPE

AI Development

## INDUSTRY

Community

## PROJECT DESCRIPTION

We developed a custom AI-powered document summarizer that uses advanced natural language processing to automatically extract key information from lengthy documents. The tool provides concise, accurate summaries, enabling users to quickly grasp essential content. Designed for efficiency and scalability, it enhances productivity by reducing the time spent reviewing large volumes of text.

## PROJECT TITLE

Exam Question Bank Platform

## TYPE

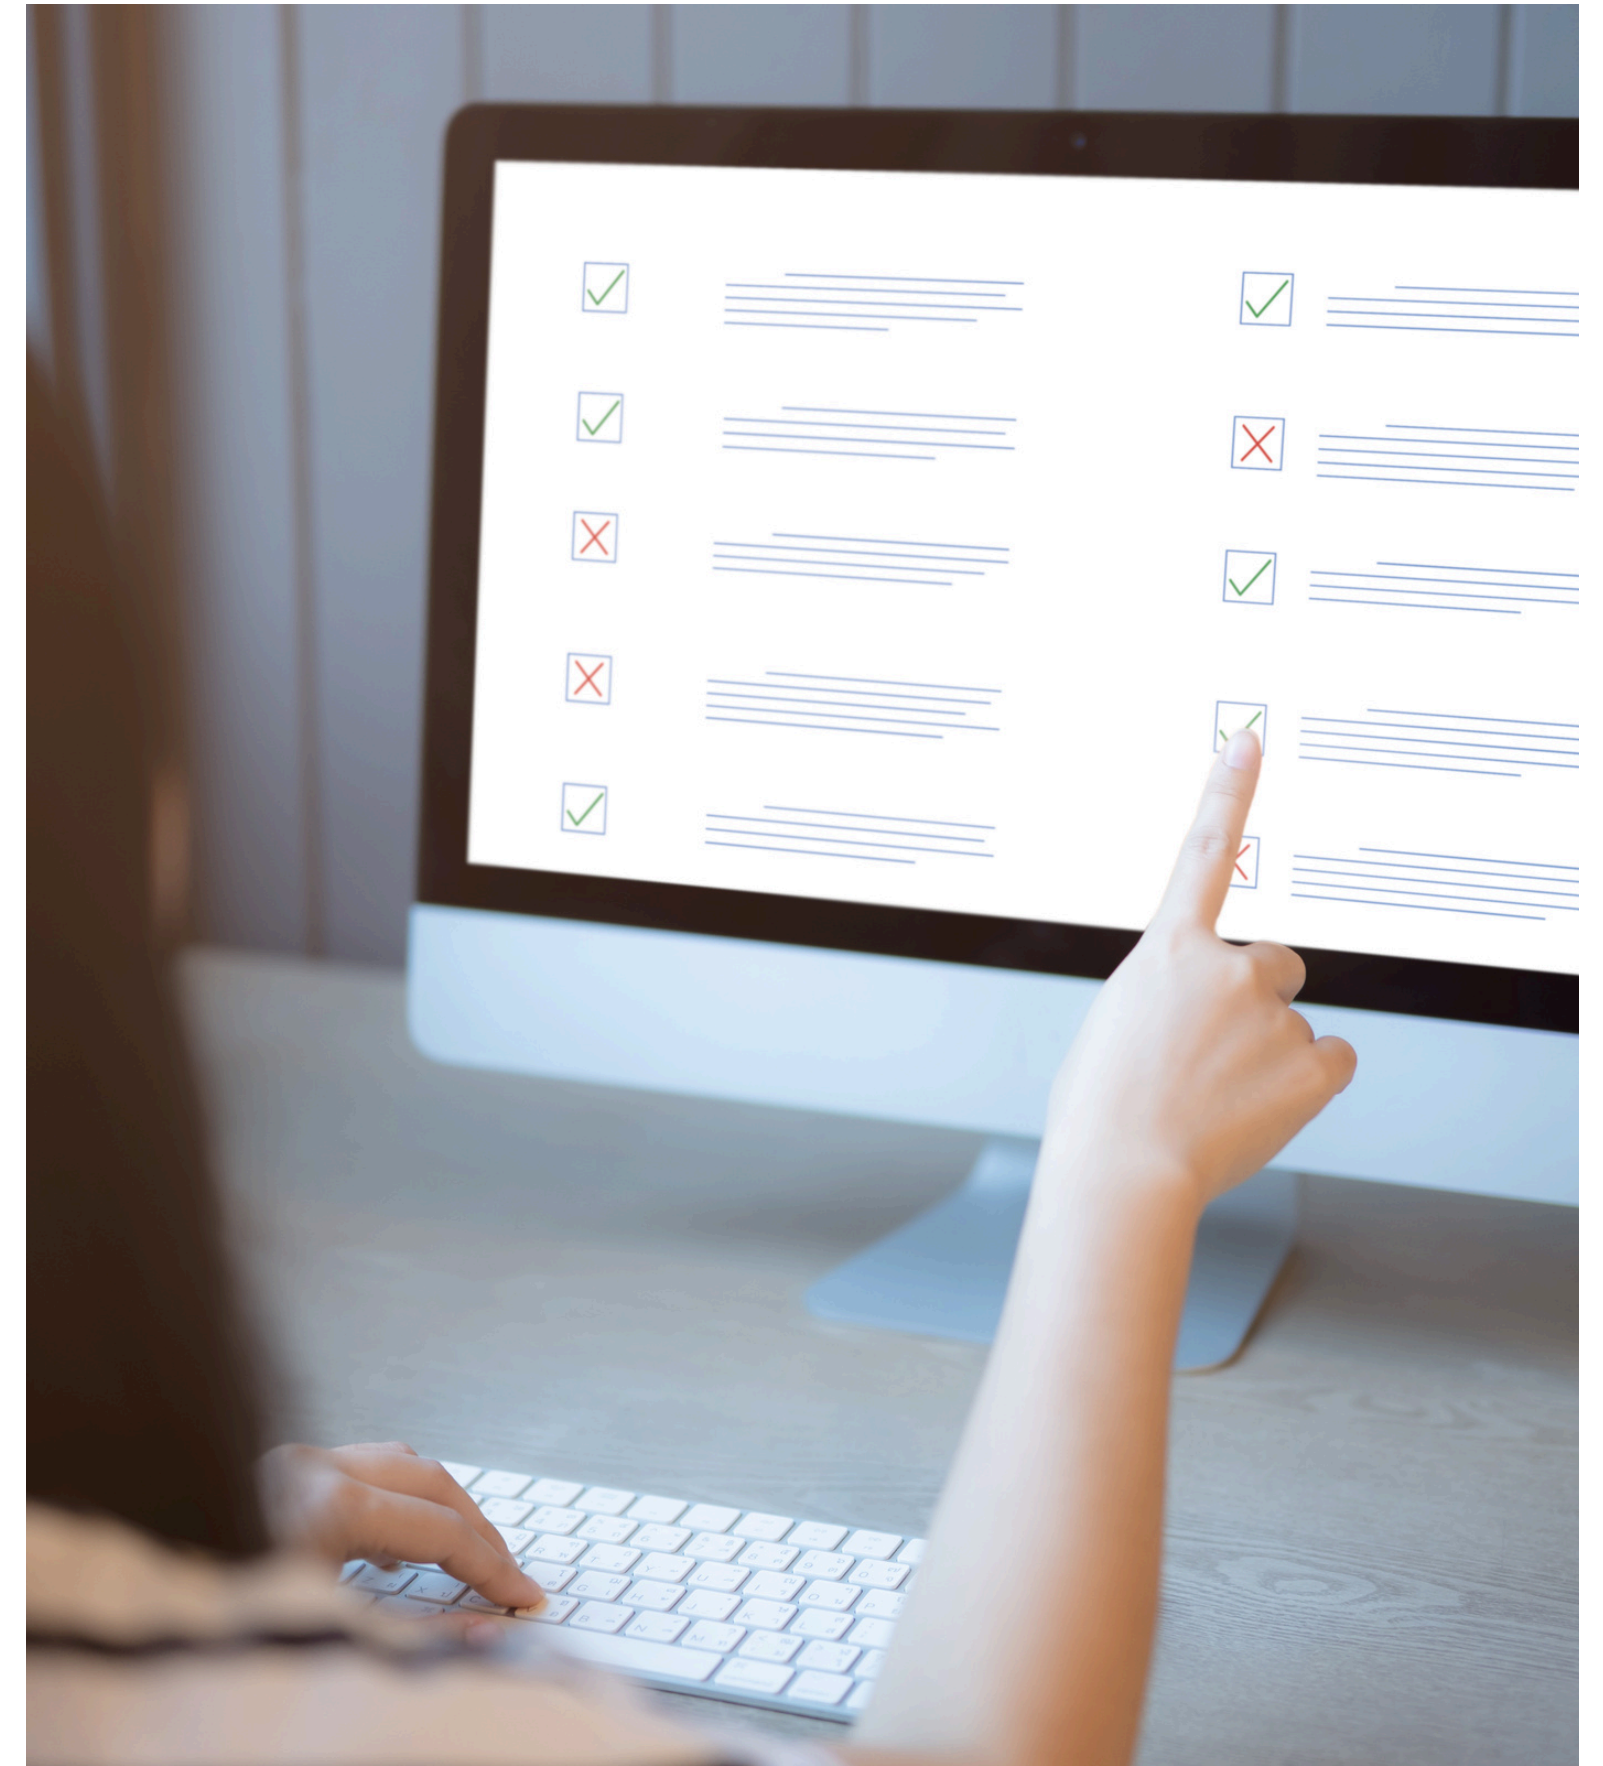

Web Development

## INDUSTRY

Education

## PROJECT DESCRIPTION

We developed a robust exam question bank platform that allows administrators to upload and manage various types of exams from the backend. The platform enables users to purchase and subscribe to access a wide range of exam materials. With an intuitive interface and secure payment system, it offers a seamless experience for both content creators and users seeking exam preparation resources.

## PROJECT TITLE

Shuttle App

## TYPE

GPS Location Based Mobile App

## INDUSTRY

Transportation

## PROJECT DESCRIPTION

We developed a shuttle app that leverages GPS technology to provide real-time tracking and scheduling for shuttle services. The app features a mobile frontend for users to view shuttle locations, book rides, and receive updates, while the web backend allows administrators to manage routes, schedules, and monitor vehicle statuses. The solution enhances convenience and efficiency for both passengers and operators.

## PROJECT TITLE

Local Produce Delivery Service

## TYPE

Web & Mobile App Development

## INDUSTRY

Services

## PROJECT DESCRIPTION

We developed a local produce delivery application that aggregates multiple local farmers and vendors, providing users with easy access to fresh, seasonal produce. The platform, available on both web and mobile, simplifies the ordering process and ensures reliable, direct-to-door delivery.

## PROJECT TITLE

Children's Day Care

## TYPE

Web Development

## INDUSTRY

Daycare

## PROJECT DESCRIPTION

We developed a comprehensive children's daycare web service designed to streamline operations for a daycare center. The platform features parent communication tools, lead management, online fee collection, and an integrated CRM system, all aimed at improving efficiency and enhancing the user experience.

## PROJECT TITLE

Property Management

## TYPE

Web & Mobile App Development

## INDUSTRY

Real Estate

## PROJECT DESCRIPTION

We developed a web and mobile app for a property management company specializing in residential maintenance and rent collection. The platform enables property owners to easily manage maintenance requests, track repairs, and securely process rent payments. With its user-friendly interface and seamless functionality, the app simplifies day-to-day operations, improving efficiency for both property managers and tenants.

## PROJECT TITLE

Online Ticketing System

## TYPE

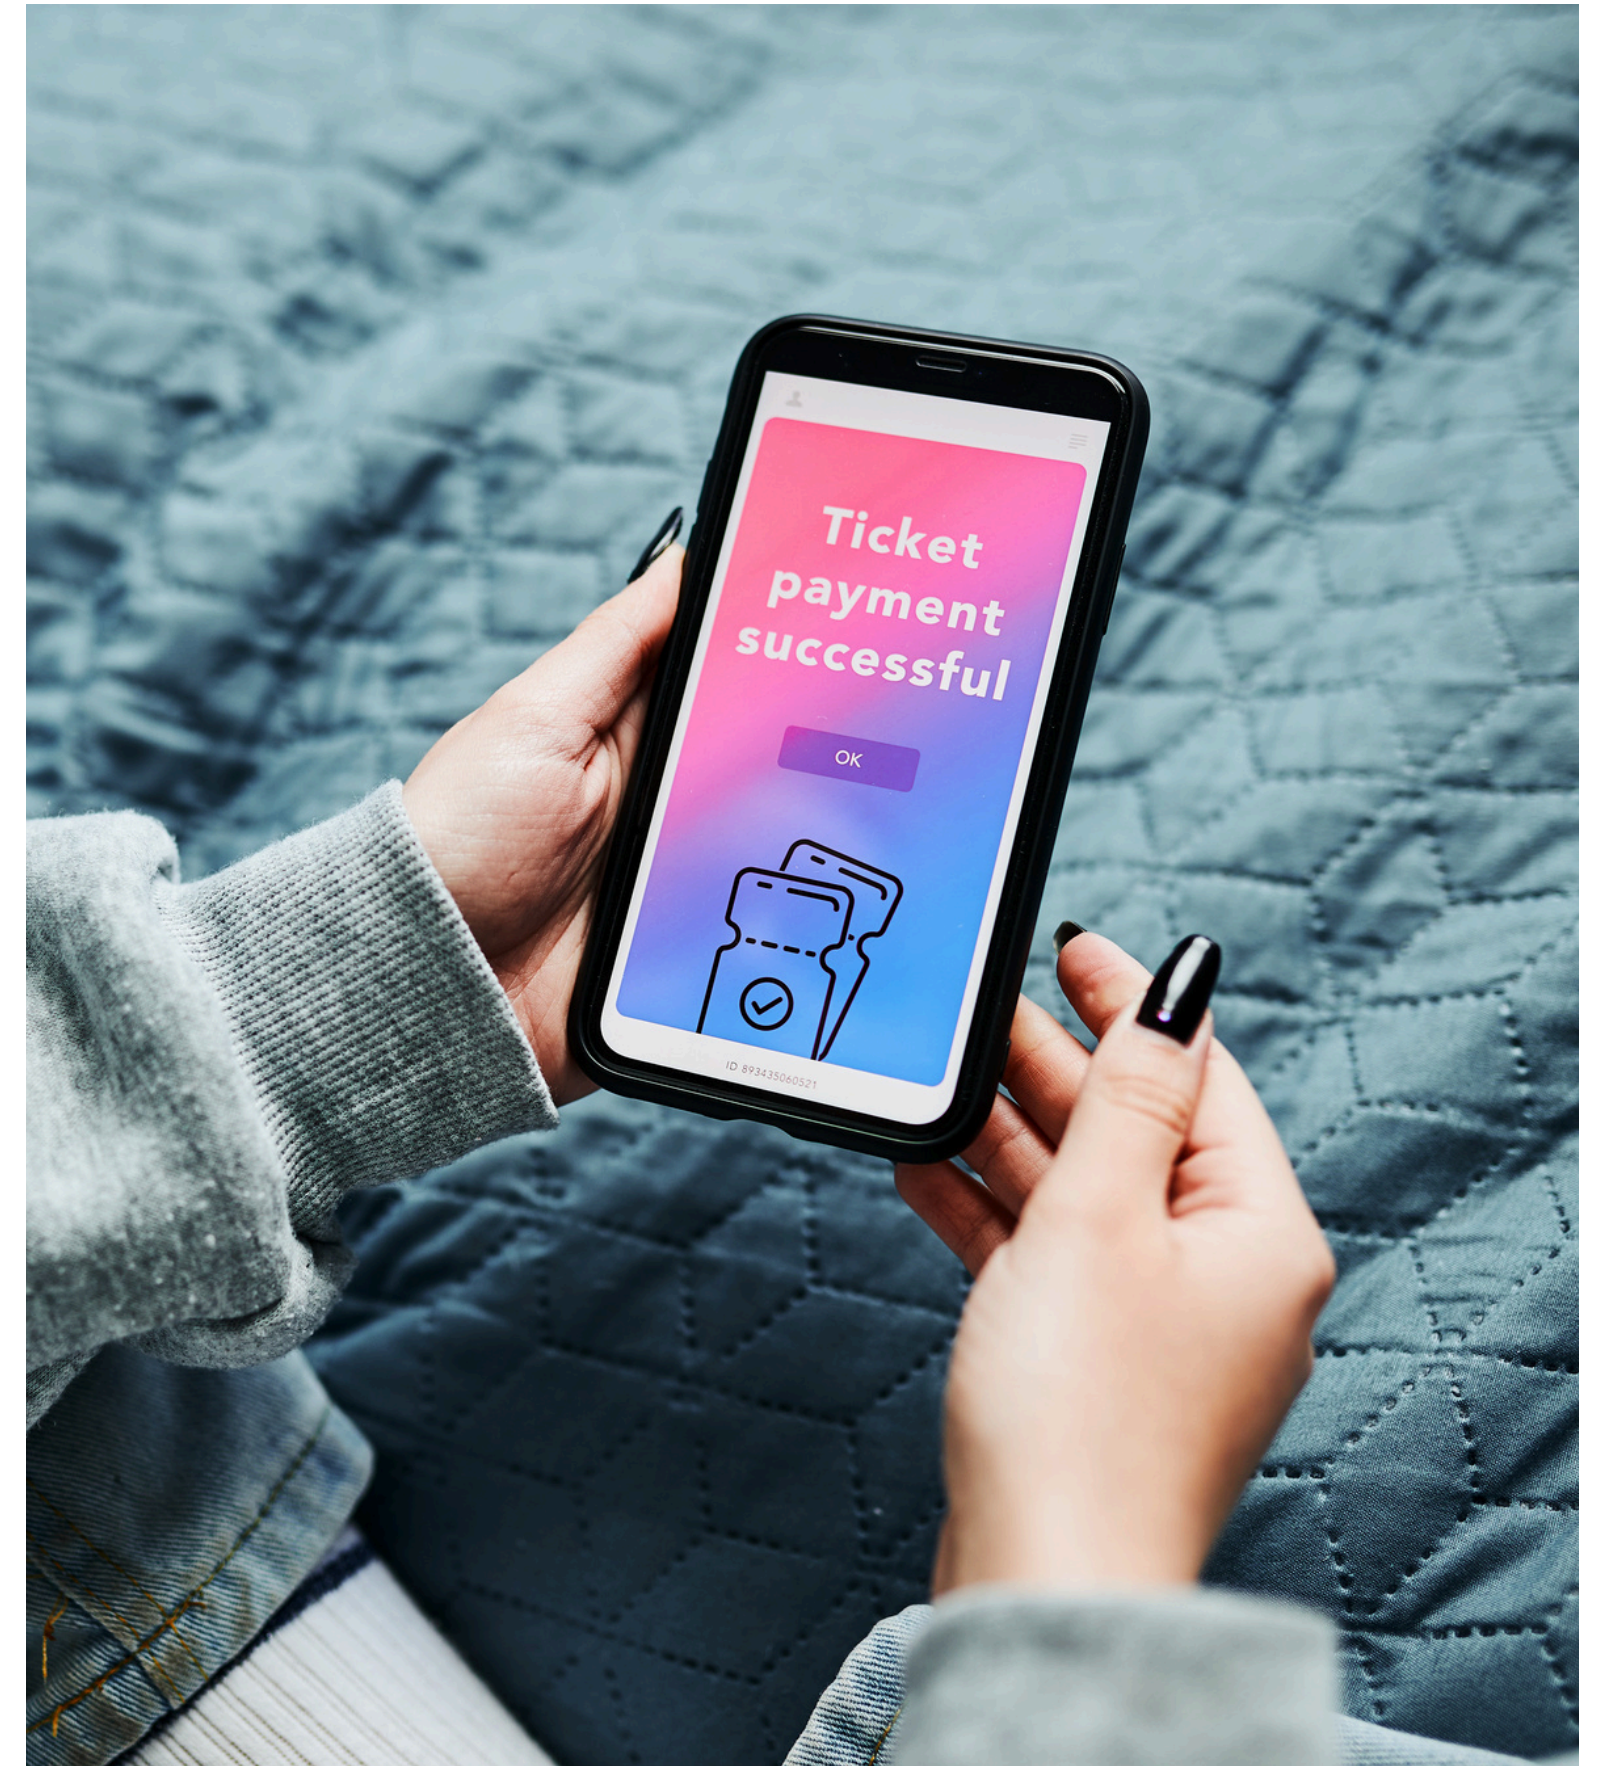

Migration from Legacy Software to Web-Based

## INDUSTRY

Entertainment

## PROJECT DESCRIPTION

We migrated a legacy desktop ticketing system to a modern, web-based platform, enhancing accessibility and user experience. The new solution included payment gateway integration, allowing for secure and efficient online transactions. This transition not only streamlined ticket management but also provided customers with a more flexible, convenient way to book and pay for services.

## PROJECT TITLE

On-Demand Service Provider

## TYPE

Web & Mobile App Development

## INDUSTRY

Services

## PROJECT DESCRIPTION

We developed a comprehensive web and mobile app for an on-demand service provider offering a range of services. The platform enables users to quickly book and manage services with ease, featuring real-time scheduling, secure payment integration, and a seamless user interface. By connecting customers with trusted professionals, the app delivers convenience and reliability for a variety of on-demand needs.

## PROJECT TITLE

Radio Streaming

## TYPE

Web & Mobile App Development

## INDUSTRY

Entertainment, Live Streaming

## PROJECT DESCRIPTION

We developed a custom radio streaming website and mobile app that allows users to stream live radio featuring a user-friendly interface and integrated push notifications, enabling real-time updates for new shows, station announcements, and alerts.

The solution is designed for seamless access across devices, enhancing listener engagement and experience.

## PROJECT TITLE

School Management Software

## TYPE

Web Development

## INDUSTRY

Education

## PROJECT DESCRIPTION

We developed a comprehensive school management software that integrated multiple modules to streamline administrative tasks. The platform includes features for attendance management, exam scheduling and tracking, admission processes, and transportation coordination. With its intuitive interface, the software enhances operational efficiency, improves communication, and simplifies school management for both staff and students.

## PROJECT TITLE

Virtual Data Room

## TYPE

Web Development

## INDUSTRY

Directory & Folder Management

## PROJECT DESCRIPTION

We developed a web-based platform for a scalable directory and file management system, designed to handle large volumes of data with ease. The platform includes a robust user authentication mechanism, offering granular access control to ensure secure file sharing and management. With a focus on scalability and security, the system streamlines document storage and collaboration while protecting sensitive information.

## PROJECT TITLE

Primary & Secondary School Website

## TYPE

Web Development

## INDUSTRY

Education

## PROJECT DESCRIPTION

We developed a dynamic website for a primary and secondary school, featuring sections for alumni, donations, and faculty.

The website enables alumni to reconnect with the school, offers a seamless donation information for supporters. With its user-friendly design, the site strengthens the school's online presence, fostering stronger connections and engagement among all stakeholders.
